

Calculations for "Selection Wages and Discrimination" by Ekkehart Schlicht

Mathematica 6 Notebook

Definition of Auxiliary Function ϕ and its Derivatives

$$\phi[w_, W_, s_, n_] := Integrate[f[\theta, w, W], \{\theta, s, \theta_1\}] - n$$

$$\phi[w, W, s, n]$$

$$-n + \int_s^{\theta_1} f[\theta, w, W] d\theta$$

$$\phi_w[w_, W_, s_, n_] := D[\phi[w, W, s, n], w]$$

$$\phi_w[w, W, s, n]$$

$$\int_s^{\theta_1} f^{(0,1,0)}[\theta, w, W] d\theta$$

$$\phi_W[w_, W_, s_, n_] := D[\phi[w, W, s, n], W]$$

$$\phi_W[w, W, s, n]$$

$$\int_s^{\theta_1} f^{(0,0,1)}[\theta, w, W] d\theta$$

$$\phi_s[w_, W_, s_, n_] := D[\phi[w, W, s, n], s]$$

$$\phi_s[w, W, s, n]$$

$$-f[s, w, W]$$

$$\phi_n[w_, W_, s_, n_] := D[\phi[w, W, s, n], n]$$

$$\phi_n[w, W, s, n]$$

-1

Derivatives (5)

$$s_w = - \frac{\phi_w[w, W, s, n]}{\phi_s[w, W, s, n]}$$

$$\frac{\int_s^{\theta_1} f^{(0,1,0)}[\theta, w, W] d\theta}{f[s, w, W]}$$

$$s_w = - \frac{\phi_w[w, W, s, n]}{\phi_s[w, W, s, n]}$$

$$\frac{\int_s^{\theta_1} f^{(0,0,1)}[\theta, w, W] d\theta}{f[s, w, W]}$$

$$s_n = - \frac{\phi_n[w, W, s, n]}{\phi_s[w, W, s, n]}$$

$$- \frac{1}{f[s, w, W]}$$

Derivatives of Auxiliary Function A (Average Productivity) and Derivatives

$$A[s_, w_, W_] := \frac{\text{Integrate}[\theta f[\theta, w, W], \{\theta, s, \theta_1\}]}{\text{Integrate}[f[\theta, w, W], \{\theta, s, \theta_1\}]}$$

$$A[s, w, W]$$

$$\frac{\int_s^{\theta_1} \theta f[\theta, w, W] d\theta}{\int_s^{\theta_1} f[\theta, w, W] d\theta}$$

$$A_s[s_, w_, W_] := D[A[s, w, W], s]$$

$$A_s[s, w, W]$$

$$- \frac{s f[s, w, W]}{\int_s^{\theta_1} f[\theta, w, W] d\theta} + \frac{f[s, w, W] \int_s^{\theta_1} \theta f[\theta, w, W] d\theta}{\left(\int_s^{\theta_1} f[\theta, w, W] d\theta\right)^2}$$

$$A_w[s_, w_, W_] := D[A[s, w, W], w]$$

$$A_w[s, w, W]$$

$$- \frac{\left(\int_s^{\theta_1} \theta f[\theta, w, W] d\theta\right) \int_s^{\theta_1} f^{(0,1,0)}[\theta, w, W] d\theta}{\left(\int_s^{\theta_1} f[\theta, w, W] d\theta\right)^2} + \frac{\int_s^{\theta_1} \theta f^{(0,1,0)}[\theta, w, W] d\theta}{\int_s^{\theta_1} f[\theta, w, W] d\theta}$$

$$A_W[s_, w_, W_] := D[A[s, w, W], W]$$

$$A_W[s, w, W]$$

$$- \frac{\left(\int_s^{\theta_1} \theta f[\theta, w, W] d\theta\right) \int_s^{\theta_1} f^{(0,0,1)}[\theta, w, W] d\theta}{\left(\int_s^{\theta_1} f[\theta, w, W] d\theta\right)^2} + \frac{\int_s^{\theta_1} \theta f^{(0,0,1)}[\theta, w, W] d\theta}{\int_s^{\theta_1} f[\theta, w, W] d\theta}$$

Derivatives (7)

$$a_w = \text{Simplify}\left[A_w[s, w, W] + A_s[s, w, W] s_w /. \int_s^{\theta_1} f[\theta, w, W] d\theta \rightarrow n\right]$$

$$- \frac{s \int_s^{\theta_1} f^{(0,1,0)}[\theta, w, W] d\theta + \int_s^{\theta_1} \theta f^{(0,1,0)}[\theta, w, W] d\theta}{n}$$

$$\begin{aligned}
\mathbf{a}_w &= \text{Simplify}\left[\mathbf{A}_w[\mathbf{s}, w, W] + \mathbf{A}_s[\mathbf{s}, w, W] \mathbf{s}_w /. \int_s^{\theta_1} \mathbf{f}[\theta, w, W] d\theta \rightarrow \mathbf{n}\right] \\
&= \frac{-s \int_s^{\theta_1} \mathbf{f}^{(0,0,1)}[\theta, w, W] d\theta + \int_s^{\theta_1} \theta \mathbf{f}^{(0,0,1)}[\theta, w, W] d\theta}{\mathbf{n}} \\
\mathbf{a}_n &= \text{Simplify}[\mathbf{A}_s[\mathbf{s}, w, W] \mathbf{s}_n] \\
&= \frac{s \int_s^{\theta_1} \mathbf{f}[\theta, w, W] d\theta - \int_s^{\theta_1} \theta \mathbf{f}[\theta, w, W] d\theta}{\left(\int_s^{\theta_1} \mathbf{f}[\theta, w, W] d\theta\right)^2} \\
\mathbf{a}_{ww} &= \mathbf{D}\left[\frac{-s \int_s^{\theta_1} \mathbf{f}^{(0,1,0)}[\theta, w, W] d\theta + \int_s^{\theta_1} \theta \mathbf{f}^{(0,1,0)}[\theta, w, W] d\theta}{\mathbf{n}}, w\right] + \\
&\quad \mathbf{D}\left[\frac{-s \int_s^{\theta_1} \mathbf{f}^{(0,1,0)}[\theta, w, W] d\theta + \int_s^{\theta_1} \theta \mathbf{f}^{(0,1,0)}[\theta, w, W] d\theta}{\mathbf{n}}, s\right] \mathbf{s}_w \\
&= \frac{\left(\int_s^{\theta_1} \mathbf{f}^{(0,1,0)}[\theta, w, W] d\theta\right)^2}{\mathbf{n} \mathbf{f}[\mathbf{s}, w, W]} + \frac{-s \int_s^{\theta_1} \mathbf{f}^{(0,2,0)}[\theta, w, W] d\theta + \int_s^{\theta_1} \theta \mathbf{f}^{(0,2,0)}[\theta, w, W] d\theta}{\mathbf{n}} \\
\mathbf{a}_{wW} &= \mathbf{D}\left[\frac{-s \int_s^{\theta_1} \mathbf{f}^{(0,1,0)}[\theta, w, W] d\theta + \int_s^{\theta_1} \theta \mathbf{f}^{(0,1,0)}[\theta, w, W] d\theta}{\mathbf{n}}, W\right] + \\
&\quad \mathbf{D}\left[\frac{-s \int_s^{\theta_1} \mathbf{f}^{(0,1,0)}[\theta, w, W] d\theta + \int_s^{\theta_1} \theta \mathbf{f}^{(0,1,0)}[\theta, w, W] d\theta}{\mathbf{n}}, s\right] \mathbf{s}_w \\
&= \frac{\left(\int_s^{\theta_1} \mathbf{f}^{(0,0,1)}[\theta, w, W] d\theta\right) \int_s^{\theta_1} \mathbf{f}^{(0,1,0)}[\theta, w, W] d\theta}{\mathbf{n} \mathbf{f}[\mathbf{s}, w, W]} + \\
&\quad \frac{-s \int_s^{\theta_1} \mathbf{f}^{(0,1,1)}[\theta, w, W] d\theta + \int_s^{\theta_1} \theta \mathbf{f}^{(0,1,1)}[\theta, w, W] d\theta}{\mathbf{n}}
\end{aligned}$$

Elasticity of Productivity (10)

$$\begin{aligned}
\eta &= -\mathbf{a}_n \frac{\mathbf{n}}{\mathbf{a}} \\
&= \frac{-\mathbf{a} + \mathbf{s}}{\mathbf{a}} \\
&= \text{Simplify}[\eta == 1 - \mathbf{s} / \mathbf{a}] \\
&= \text{True}
\end{aligned}$$

Lagrangian (13) and Derivatives (14), (15)

$$\begin{aligned}
\mathbf{L} &= \mathbf{p} \left(\frac{\mathbf{n}_f}{\mathbf{n}} \mathbf{a}_f[\mathbf{w}_f, W_f, \mathbf{n}_f] + \frac{\mathbf{n}_m}{\mathbf{n}} \mathbf{a}_m[\mathbf{w}_m, W_m, \mathbf{n}_m] \right) - \left(\frac{\mathbf{n}_f}{\mathbf{n}} \mathbf{w}_f + \frac{\mathbf{n}_m}{\mathbf{n}} \mathbf{w}_m \right) + \lambda (\mathbf{n} - \mathbf{n}_f - \mathbf{n}_m) \\
&= \lambda (\mathbf{n} - \mathbf{n}_f - \mathbf{n}_m) - \frac{\mathbf{n}_f \mathbf{w}_f}{\mathbf{n}} - \frac{\mathbf{n}_m \mathbf{w}_m}{\mathbf{n}} + \mathbf{p} \left(\frac{\mathbf{n}_f \mathbf{a}_f[\mathbf{w}_f, W_f, \mathbf{n}_f]}{\mathbf{n}} + \frac{\mathbf{n}_m \mathbf{a}_m[\mathbf{w}_m, W_m, \mathbf{n}_m]}{\mathbf{n}} \right)
\end{aligned}$$

D[L, n_f]

$$-\lambda - \frac{w_f}{n} + p \left(\frac{a_f[w_f, W_f, n_f]}{n} + \frac{n_f a_f^{(0,0,1)}[w_f, W_f, n_f]}{n} \right)$$

D[L, n_m]

$$-\lambda - \frac{w_m}{n} + p \left(\frac{a_m[w_m, W_m, n_m]}{n} + \frac{n_m a_m^{(0,0,1)}[w_m, W_m, n_m]}{n} \right)$$

D[L, w_f]

$$-\frac{n_f}{n} + \frac{p n_f a_f^{(1,0,0)}[w_f, W_f, n_f]}{n}$$

D[L, w_m]

$$-\frac{n_m}{n} + \frac{p n_m a_m^{(1,0,0)}[w_m, W_m, n_m]}{n}$$

D[L, λ]

$$n - n_f - n_m$$
